GEM STONES

- ❖ Gemstones are nature's wonderful gift to mankind.
- ❖ Gems are precious & valubles as they are Rare, Beautiful & Eternal.
- ❖ Gemstones are believed to have Healing Power and source of Positive Energy.
- ❖ buy only 100% Natural, untreated & good quality Gemstones for best results.

About us

Angalamma Gems deals in only 100% Natural, Untreated, & Best Quality Gems at wholesale prices. We have a team of Gem experts/gemologists who collect best of Gems from various sources after careful examination. We have Gemstones of all varieties and origins like Burmese Ruby, Columbian & Zambian Emeralds, Ceylon Sapphires, Australian Opal, South Sea Pearls etc. All Gemstones are Lab Tested & Certified. So, with each Gemstone, you will receive a Laboratory Report for the Authentication of the Gemstone. Each gemstone is graded very carefully on the Quality Parameters, so that the customer gets best value for money.

Why us

Today the market is flooded with Synthetics, Simulants (Look alike) & Treated Gemstones. Most of the Gemstones in the market are treated for Color, Clarity or both to improve their outer appearance & thus higher value. Thats when the need & lookout for genuine Gem Supplier starts.

How to buy a Gemstone.

- Exact weight of the Gemstone as per you requirement.
- Choose the Shape & Cutting style as u like (Round, Cushion, Oval, Rectangular, Marquise etc).
- If the Gemstone is Natural (Only cut & polished to its present state).
- If the Gemstone is Treated/Untreated (Treatments are carried out to enhance its outer appearance).
- Is the Price Worth its Quality (i.e. Color, Clarity, Cut, Carat, Luster & Finish).
- Durability of Gemstone (Hardness, Toughness, Thermal Stability & Chemical Stability).
- Appropriate Stone setting that protects the Gemstone.
- Methods to clean the Gemstone.
- Always ask for Authentication Report of the Gemstone form a reputed Gemological Laboratory.
